

Solution Overview

Industry

Food and Beverage

Company Profile

The customer is a corporate enterprise for processing and exporting fish products to European and Asian destinations. It has four operational centers located in different islands and each processing center is involved in purchasing, storing processing & marketing tons and tons of fisheries products. Tuna fish caught using pole and line is the specialty of this client.

Benefits

- Tracking Requisitions & purchases made easier and Requisitions created in the site are transferred from the site to procurement through data export / import process thereby reducing the manual work
- Tracking Fixed assets value & its depreciation is very easy now
- Many reports with sufficient data where readily available to assist the decision makers
- Check printing is computerized

Technology Used

- Microsoft Dynamics Solomon
- Microsoft SQL Server 2000
- FRx

Partner

Congruent Info-Tech Pvt. Ltd

www.congruentindia.com

Client selected Congruent as their partner for developing and implementing Microsoft Dynamics Solomon

Client Situation

- Absence of an integrated system to streamline & track fish purchases from different processing centers
- Need for system to maintain Fixed assets

Congruent's Solution

Congruent has provided an effective solution (Microsoft Dynamics Solomon) to integrate all the process and to reduce the manual work

- Developed a custom module (Purchase Requisition) - to create the item requisitions from each site, maintain quotes of different vendors, receiving & delivering goods from procurement to sites
- Developed Custom screens to export the Purchase requisitions from site to procurement & to import goods delivery details from procurement to sites
- Developed a custom module - Fixed Assets to track the Fixed assets in the organization
- Created various reports to view status of requisition, purchase order, Item costing, fixed asset reports and also other financial reports & improved the efficiency of the check printing process

Congruent Key Challenges

- Collecting data from various stream of users was very challenging
- Training the users with limited system knowledge was also a challenge
- Streamlining the fish purchase from the various sites which followed different rules was a challenge
